SCRUM OVERVIEW

Team Members:

>   Product Owner: Mariefher Grace Z. Villanueva
>   Scrum Master: Mariefher Grace Z. Villanueva
>   Development Team: Mariefher Grace Z. Villanueva

Product: Marper's Web (personal website)

Product Backlog:

#	User Stories	Acceptance Criteria	Story Points	Value Points	BFB
1	As the product owner, I want to identify my goals and create a product backlog and scrum overview so that the team objectives in delivering the product will be clear.	-Given that I was able to identify my objectives, the scrum overview and product backlog must be ready.	2	8	4
2	As the scrum master, I want to learn about scrum so that I will be able to make my team be more efficient in delivering the desired product.	-Given that I was able to research and learn more about scrum, I should be able to discuss what it is all about.	13	55	4.2
3	As a product owner, I want to make a personal website so that potential clients may be able to view my work and know more about me.	-Given that the team is ready to make a website, I expect a webpage that shows the information of the artist and their contact information.	13	89	6.8
4	As a developer, I want to learn more about wireframes so that I will be able to easily layout the website.	-Given that I was able to research and learn more about wireframes, I should be able to discuss what it is and how I implemented it on the website.	8	21	2.6
5	As a developer, I want to learn more about sitemaps so that the website created will be more organized.	-Given that I was able to research and learn more about sitemap, I should be able to discuss what it is and how I implemented it on the website.	5	21	4.2
6	As a developer, I want the website to be interactive so that it will be more appealing to those who will visit the website.	-Given that I was able to learn more about HTML, CSS, and JS, I should be able to implement it on the code for the website.	21	144	6.9
7	As a user, I want to be able to browse through the website so that I will know more about the artist, be able to preview their works, and access to their contact information.	-Given that the website is ready, the user must be able to navigate through the website and be able to access the wanted information.	2	2	1
8	As a product owner, I want to be more accessible to the people that they can contact me easily.	-Given that the team is ready and knowledgeable enough, I want to have a contact form on the website so that users can contact me directly.	13	89	6.8

9	As a developer, I want to learn how to make databases and connect a website to a server so that it can be implemented to the contact form of the website.	Given that I was able to learn more about backend programming, I should be able to create a contact form on the website that will take some information from the sender and their message.	5	21	4.2
10	As an administrator, I want to learn how to manage and view the databases so that I can access the information provided to the website.	Given that I was able to learn about handling databases, I should be able to view, insert, and remove data in the database.	5	21	4.2

Sprint 3

Sprint Backlog:

#	User Stories	Tasks	Time Allotted
1	As the product owner, I want to identify my goals and create a product backlog and scrum overview so that the team objectives in delivering the product will be clear.	-Update the sprint and product backlog	1 hour
2	As a product owner, I want to be more accessible to the people that they can contact me easily.	-Test if the contact form works	30 minutes
3	As a developer, I want to learn how to make databases and connect a website to a server so that it can be implemented to the contact form of the website.	-Review HTML, CSS, and JS -Review SQL -Review PHP -Research and learn about jQuery and Ajax. -Setup the needed software for coding. -Follow the layout of the contact form according to the wireframe. -Make a video of the end product and at the same time, discuss the implementation of the code.	4 days
4	As an administrator, I want to learn how to manage and view the databases so that I can access the information provided to the website.	Given that I was able to learn about handling databases, I should be able to view, insert, and remove data in the database.	3 hours

Sprint Duration: 4 days

Daily Scrum

	DAY 1	DAY 2	DAY 3	DAY 4
What did you do yesterday?	None	Update scrum status and start reviewing HTML, CSS, & JavaScript	Start implementing the Contact Form in the Code and review SQL and PHP	Learn about jQuery and Ajax and implemented it into code
What will you do today?	Update scrum status and start reviewing HTML, CSS, & JavaScript	Start implementing the Contact Form in the Code and review SQL and PHP	Learn about jQuery and Ajax and implemented it into code	Manage database through SQL and PHP, testing, film and edit video
Obstacles	Other work unrelated to the sprint	Other work unrelated to the sprint	Other work unrelated to the sprint	Other work unrelated to the sprint

Increment Review

-The necessary deliverables (Scrum discussion, PHP files for index and database) were successfully produced.

Sprint Retrospective:

What worked well:

-Development of the website (Back-end)

What did not:

-Code not working (fixed)
-Database not updating (fixed)

Blockers:
-Procrastination
-Mental health
-Power interruptions
-Natural Calamities
-Distractions

Things to Improve:

-Time management
-Focus
